PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building scalable web applications using modern technologies. Proven track record delivering production-ready solutions for e-commerce platforms, public-sector systems and SaaS products.

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Dec 2025 - Present

Uplyft

- Developing enterprise and public-sector web applications using React.js, Node.js/Express.js, ASP.NET Core, RESTful APIs, and database-driven admin dashboards.
- Built modules for the Grand Serail platform to manage structured content such as news, Serail information, agendas, and document repositories.
- Developed StayWise, a hotel and reservation platform supporting hourly and daily stays, booking workflows, availability handling, and administration features.
- Contributed to a Ministry of Interior agency-management system covering agencies, personnel, weapons, vehicles, radio devices, institutions, monthly submissions, request handling, and admin approval actions.
- Implemented mobile API endpoints, admin dashboard features, .NET background services for scheduled jobs, and FCM-compatible notification flows for Flutter mobile app integration.

Freelance Full-Stack Developer

2023 - Present

Self-Employed

- Delivered 5+ production web applications for clients across e-commerce, healthcare, laboratory services, and tech platforms using Laravel, React.js, Vue.js, and Next.js
- Developed and deployed finleague.me, a financial education platform featuring dynamic content management, SEO-optimized pages, downloadable financial guides, and a scalable Laravel-based backend architecture.
- Developed complete e-commerce solution for aboulira.com (motorcycle parts retailer) including shopping cart, checkout flow, order tracking system, inventory management, and dynamic product catalog
- Transformed complex Figma designs into pixel-perfect responsive interfaces for tiflicare.com healthcare platform using React.js with focus on cross-browser compatibility and mobile responsiveness
- Built comprehensive application form management system for casmet.net laboratory including data validation, workflow automation, and administrative dashboard

- Created enterprise-level multi-dashboard interface for Techryt (in development) using Next.js featuring role-based access control, real-time data visualization, and modern UI/UX patterns
- Developed reusable DataTable component library with sorting, filtering, pagination, and export functionality reducing development time by 40% across projects

EDUCATION

Bachelor of Science in Computer Science *2021 - 2024*

Islamic University of Lebanon (IUL), Wardeniye
